1 Inleiding en doel

In de kern Hattem, op het noordelijke deel van het bedrijventerrein 't Veen, waren voorheen verschillende verouderde bedrijfspanden te vinden. Recent zijn de meeste van deze panden gesloopt en is Nikkels projecten bv op deze locatie voornemens woningbouw te realiseren, dit komt overeen met de ontwerp Structuurvisie Hattem 2025.

De gemeente Hattem heeft in maart 2012 de ontwerp Structuurvisie Hattem 2025 opgesteld. Hierin wordt het bedrijventerrein 't Veen benoemd als herontwikkelingsgebied voor groene woonmilieus. In figuur 1 is een uitsnede van de ontwikkelingsvisie Hattem weergegeven.

Figuur 1 Ontwikkelingsvisie Hattem

In de beheersverordening 'Bedrijventerrein Het Veen' is de locatie grotendeels bestemd als 'Bedrijfsdieleinden'. Het plan is derhalve niet mogelijk volgens de beheer-verordening. Omdat herontwikkeling noodzakelijk is en zowel functioneel als ruimtelijk goed past in de omgeving, is het gemeentebestuur voornemens medewerking te verlenen aan dit initiatief. Om voorgaande juridisch-planologisch mogelijk te maken, is de vaststelling van een nieuw bestemmingsplan voor dit gebied noodzakelijk. Onderdeel van dit bestemmingsplan is een onderzoek industrielawaai. Onderhavige rapportage is een uitwerking van dit onderzoek.

1.1 Ligging en begrenzing besluitgebied

Het plangebied is gelegen ten zuiden van de oude kern van Hattem. Het gebied bestaat uit het noordelijke deel van het bedrijfenterrein 't Veen. Ten noorden van het plangebied bevindt zich de Hoopjesweg en ten westen wordt de grens gevormd door een fietspad. De bebouwing ten zuiden en oosten van het plangebied wordt voornamelijk gevormd door bedrijfspanden van het bedrijfenterrein.

Op de navolgende afbeeldingen is de globale ligging en begrenzing van het plangebied weergegeven. Voor de exacte begrenzing van het plangebied wordt verwezen naar de verbeelding van dit bestemmingsplan.

Figuur 1-1 Topografische kaart met aanduiding plangebied (blauw omkaderd) bron: opentopo.nl

Figuur 1-2 Luchtfoto met de globale ligging van het plangebied (blauw omkaderd).

2 Wet- en regelgeving

2.1 Industrielawaai

Het plan bestaat uit de realisatie van nieuwe woningen. Bij het inpassen van een dergelijke nieuwe ruimtelijke ontwikkeling dient rekening te worden gehouden met de bestaande situatie. In onderhavig geval is sprake van nieuwe woningen nabij een bestaand parkeerterrein. Het wettelijk kader splitst zich uiteen in een kader met betrekking tot Ruimtelijke Ordening en een Milieukader. Met beide aspecten dient rekening te worden gehouden.

2.1.1 Ruimtelijke ordening

Hierbij kan in eerste instantie worden uitgegaan van de richtafstanden zoals genoemd in de publicatie ‘Bedrijven & Milieuinzonerings’ van de Vereniging Nederlandse Gemeenten (VNG). Op basis van een categorie-indeling van bedrijfstypen worden hierin richtafstanden gegeven voor diverse milieuspecten, waaronder ‘geluid’. Indien deze in acht worden genomen, kan gesteld worden dat ter plaatse van woningen van derden sprake is van een (akoestisch gezien) acceptabel woon- en leefklimaat.

Bij het stellen van de richtafstanden wordt onderscheid gemaakt in twee gebiedstyperingen, te weten een ‘rustige woonwijk met weinig verkeer’ en een ‘gemengd gebied’. Indien sprake is van een gemengd gebied, kunnen de richtafstanden in algemene zin met één afstandsstep worden gereduceerd; zie tabel 1.

Omgevingstype rustige woonwijk

Een rustige woonwijk is ingericht volgens het principe van functiescheiding. Afgezien van wijk gebonden voorzieningen komen vrijwel geen andere functies (zoals bedrijven of kantoren) voor. Langs de randen, in de overgang naar mogelijke bedrijfsfuncties, is weinig verstoring door verkeer.

Omgevingstype gemengd gebied

Een gemengd gebied is een gebied met een matige tot sterke functiemenging. Direct naast woningen komen andere functies voor, zoals winkels, horeca en kleine bedrijven. Ook lintbebouwing in het buitengebied met overwegend agrarische en andere bedrijvigheid kan als gemengd gebied worden beschouwd. Gebieden die direct langs de hoofdinfrastuur liggen behoren eveneens tot het omgevingstype gemengd gebied.

| Milieucategorie | Richtafstand | |
|-----------------|-------------------|-----------------|
| | Rustige woonwijk | Gemengd gebied |
| 1 | 10 | 0 |
| 2 | 30 | 10 |
| 3.1 / 3.2 | 50 / 100 | 30 / 50 |
| 4.1 / 4.2 | 200 / 300 | 100 / 200 |
| 5.1 / 5.2 / 5.3 | 500 / 700 / 1.000 | 300 / 500 / 700 |
| 6 | 1.500 | 1.000 |

Tabel 1. Richtafstanden milieucategorieën

2.1.2 Stappen toetsingskader VNG

Stap 1

Indien de richtafstanden voor het aspect geluid niet wordt overschreden, kan verdere toetsing voor het aspect geluid achterwege blijven: buitenplanse inpassing is mogelijk.

Stap 2

Indien stap 1 niet toereikend is:

Bij een geluidsbelasting op woningen en andere geluidevoelige bestemmingen in gebiedstype rustige woonwijk van maximaal:

- 45 dB(A) langtijdgemiddelde beoordelingsniveau;
- 65 dB(A) maximale geluidsniveau (piekgeluiden);
- 50 dB(A) ten gevolge van de verkeersaantrekende werking, en:

Bij een geluidsbelasting op woningen en andere geluidevoelige bestemmingen in gebiedstype gemengd gebied van maximaal:

- 50 dB(A) langtijdgemiddelde beoordelingsniveau;
- 70 dB(A) maximale geluidsniveau (piekgeluiden);
- 50 dB(A) ten gevolge van de verkeersaantrekende werking; is een buitenplanse inpassing mogelijk.

Stap 3

Indien stap 2 niet toereikend is:

Bij een geluidsbelasting op woningen en andere geluidevoelige bestemmingen in gebiedstype rustige woonwijk van maximaal:

- 50 dB(A) langtijdgemiddelde beoordelingsniveau;
- 70 dB(A) maximale geluidsniveau (piekgeluiden);
- 50 dB(A) ten gevolge van de verkeersaantrekende werking, en:

Bij een geluidsbelasting op woningen en andere geluidevoelige bestemmingen in gebiedstype gemengd gebied van maximaal:

- 55 dB(A) langtijdgemiddelde beoordelingsniveau;
- 70 dB(A) maximale geluidsniveau (piekgeluiden);
- 65 dB(A) ten gevolge van de verkeersaantrekende werking; is een buitenplanse inpassing mogelijk. Het bevoegd gezag dient dan te motiveren waarom deze geluidsbelasting in de concrete situatie acceptabel acht, waarbij tevens de cumulatie met eventueel reeds aanwezige geluidsbelasting moet worden betrokken. Het bevoegd gezag kan daarbij maken van gemeentelijke geluidbeleid, indien de te verwachten geluidsbelasting voldoet aan de in dat gemeentelijk geluidbeleid vastgestelde grenswaarden voor het betreffende gebied.

Stap 4

Bij een hogere geluidsbelasting dan aangegeven in stap 3 zal buitenplanse inpassing doorgaans niet mogelijk zijn. Indien het bevoegd gezag nietemin tot inpassing wil overgaan, dient het dit grondig te onderzoeken, onderbouwen en motiveren waarbij tevens de cumulatie met eventueel aanwezige geluidsbelasting moet worden betrokken.

Er dient te worden opgemerkt dat bovengenoemde publicatie geen wetgeving bevat, echter gelet op jurisprudentie wel als ‘richtlijn’ kan worden gezien. Op basis van uitspraken van de Raad van State kan worden geconcludeerd dat, mits gemotiveerd, afgeweken kan worden van de VNG-richtafstanden. De motivatie kan hierbij bestaan uit het feit dat vergunningvoorschriften wellicht strenger zijn dan de richtafstanden of dat sprake is van een werkelijke geluidsuitstraling die een kortere afstand rechtvaardigt. In het laatste geval dient een en ander met een akoestisch onderzoek te worden onderbouwd. Hierbij kunnen de toetsingswaarden uit de VNG-publicatie gehanteerd worden.

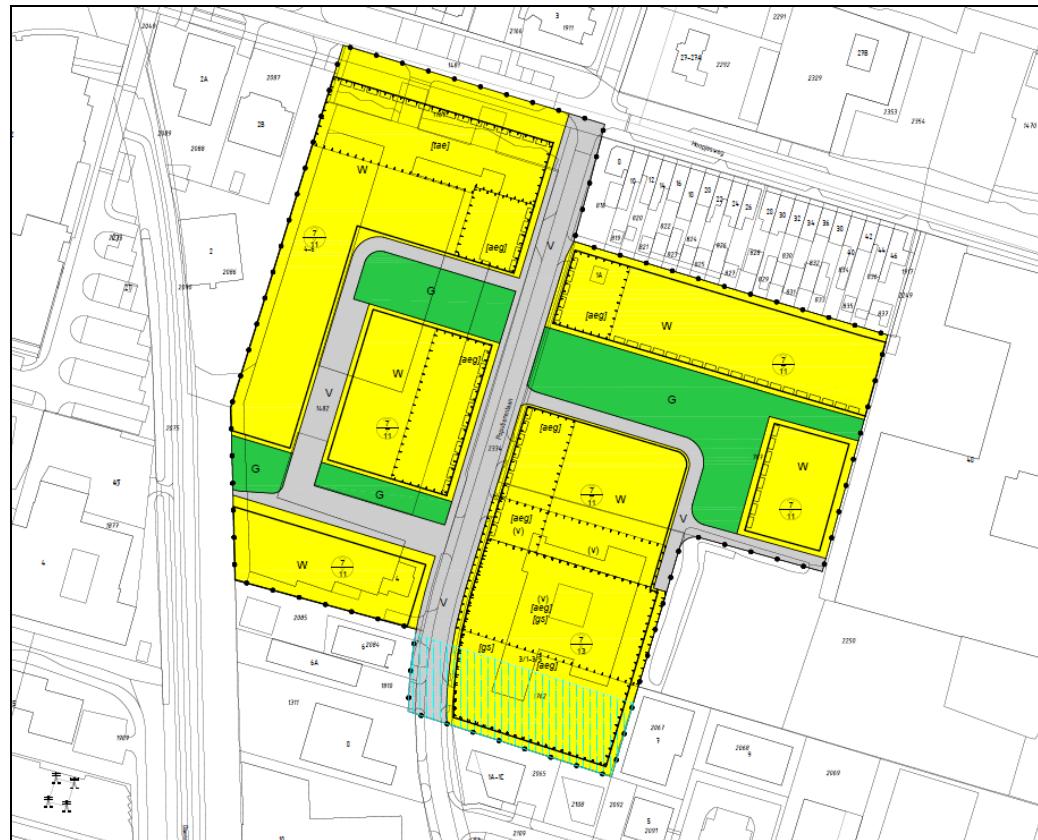

| | 7:00 - 19:00 uur | 19:00 - 23:00 uur | 23:00 - 7:00 uur |
|--|-------------------------|--------------------------|-------------------------|
| $L_{Ar,LT}$ (rustige woonwijk, weinig verkeer) | 45 dB(A) | 40 dB(A) | 35 dB(A) |
| $L_{Ar,LT}$ (gemengd gebied) | 50 dB(A) | 45 dB(A) | 40 dB(A) |
| L_{Amax} (rustige woonwijk, weinig verkeer) | 65 dB(A) | 60 dB(A) | 55 dB(A) |
| L_{Amax} (gemengd gebied) | 70 dB(A) | 65 dB(A) | 60 dB(A) |

Tabel 2. Toetsingswaarden VNG-publicatie *Bedrijven en milieuzonering*

3 Uitgangspunten

3.1 Ontwerpplan

In figuur 4 is het ontwerpplan bestemmingsplan weergegeven.

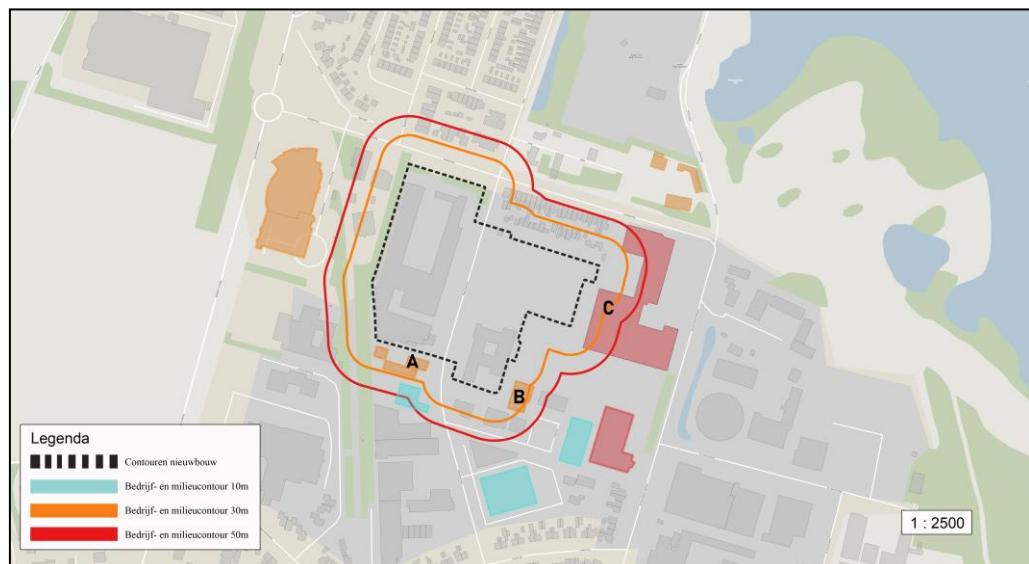

Figuur 4. Uitsnede ontwerpbestemmingsplan

Rondom het plangebied zijn nog bedrijven gevestigd. Er kan er van uit gegaan worden dat de eerste rijbebauwing binnen het plan als een gemengd gebied kan worden beschouwd. Hiervoor kan afstandstrap worden verlaagd. De woningen welke als tweede rijbebauwing in het plan liggen, kunnen gekenmerkt worden als een woningen in rustige woonwijk.

3.2 Richtafstanden

In figuur 5 is een uitsnede van de richtafstanden rondom het plangebied weergegeven.

Figuur 5. Richtafstanden

Uit figuur 5 blijkt dat er 3 bedrijven een overlap met de richtafstand kennen. In tabel 1 is een overzicht van de bedrijven weergegeven.

Tabel 1. Overzicht bedrijven

| Aanduiding | Adres | Bedrijfsnaam | Categorie | afstand |
|------------|-------------------|-------------------|-----------|---------|
| A | Populierenlaan 6a | Slijkhuis kleding | 2 | < 10 m |
| B | Lindenhof 7 | Traffic Support | 3.1 | < 10 m |
| C | Hoopjesweg 48 | Leeuw Hattem | 3.2 | < 10 m |

Aan de hand van de te verwachten situatie zijn voor de drie bedrijven een rekenmodel opgebouwd.

3.3 Conclusie richtafstanden

Het plan 't Veen te Hattem voorziet in de realisatie van een woonwijk op een voormalig bedrijventerrein. Rondom het plangebied zijn nog bedrijven gevestigd. Hierdoor kan gesteld worden dat de eerste lijn bebouwing grenzend aan het bedrijventerrein, als een gemengd gebied beschouwd kan worden. Aan de hand van de VNG-publicatie bedrijven en milieuzonering zijn richtafstanden uitgezet. Hieruit blijkt dat er nog een drietal bedrijven met de richtafstand een overlap kennen met het plangebied, het zijn Slijkhuis kleding, Traffic Support en Leeuw Hattem.

4 Resultaten

Voor de drie bedrijven aannames opgebouwd voor het langtijdgemiddelde geluidsniveau en voor de maximale geluidsniveaus.

4.1 Slijkhuis kleding

De oprit van dit bedrijf grenst direct aan het bestemmingsplan. De activiteiten buiten zullen leiden tot relevante geluidsniveaus. Rijden met voertuigen zijn in dit geval de maatgevende bronnen. In tabel 2 zijn de uitgangspunten voor dit bedrijf weergegeven.

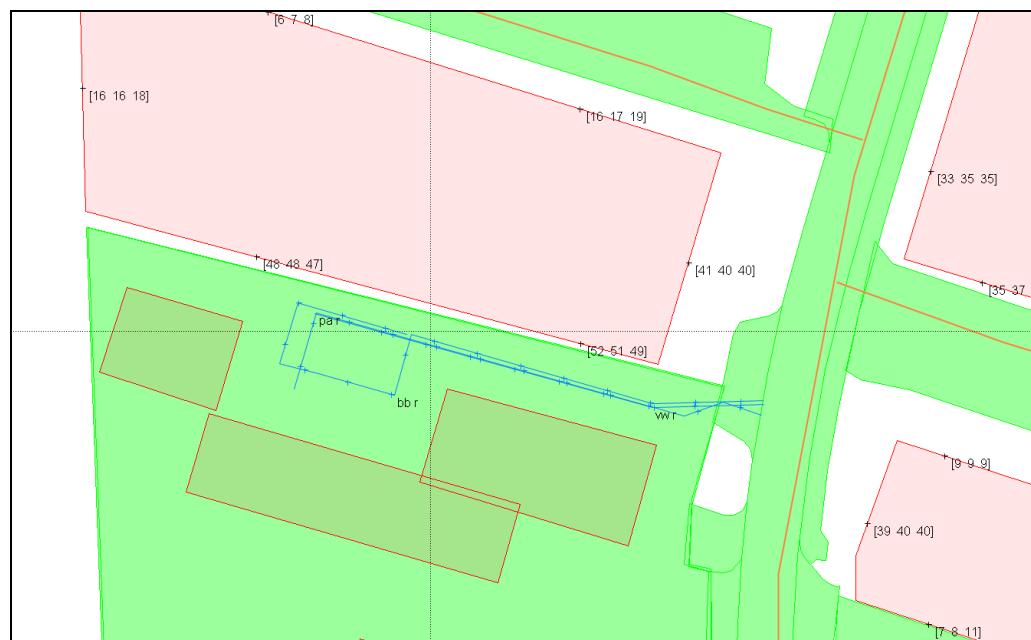

Tabel 2. Overzicht uitgangspunten Slijkhuis kleding

| Bron | Bronvermogen | Dag | Avond | Nacht |
|---|--------------|----------------------|-------|-------|
| Auto rijden | 89 dB(A) | 20 bwg ¹⁾ | 4 bwg | 0 |
| Bestelwagen rijden | 96 dB(A) | 4 bwg | 2 bwg | 0 |
| Vrachtwagen rijden | 103 dB(A) | 2 bwg | 0 | 0 |
| Portieren sluiten Lmax ²⁾ | 98 dB(A) | ✓ | ✓ | - |
| Ontluchten vrachtwagen Lmax ²⁾ | 110 dB(A) | ✓ | - | - |

¹⁾ aantal bewegingen

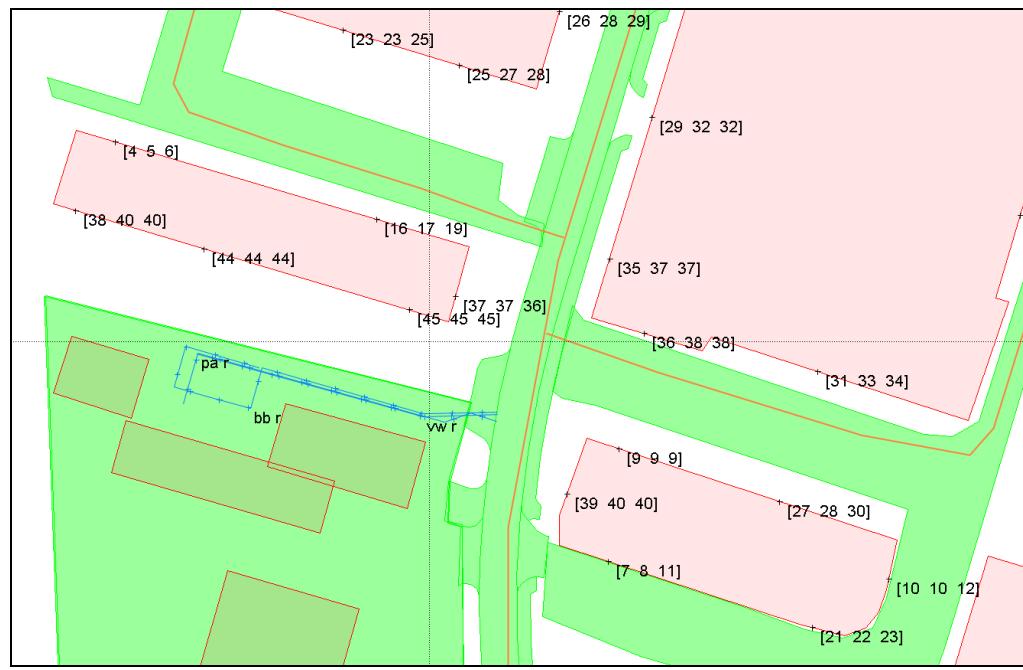

²⁾ alleen ten behoeve van het maximale geluidsniveau

In figuur 6 is het langtijdgemiddelde geluidsniveau weergegeven.

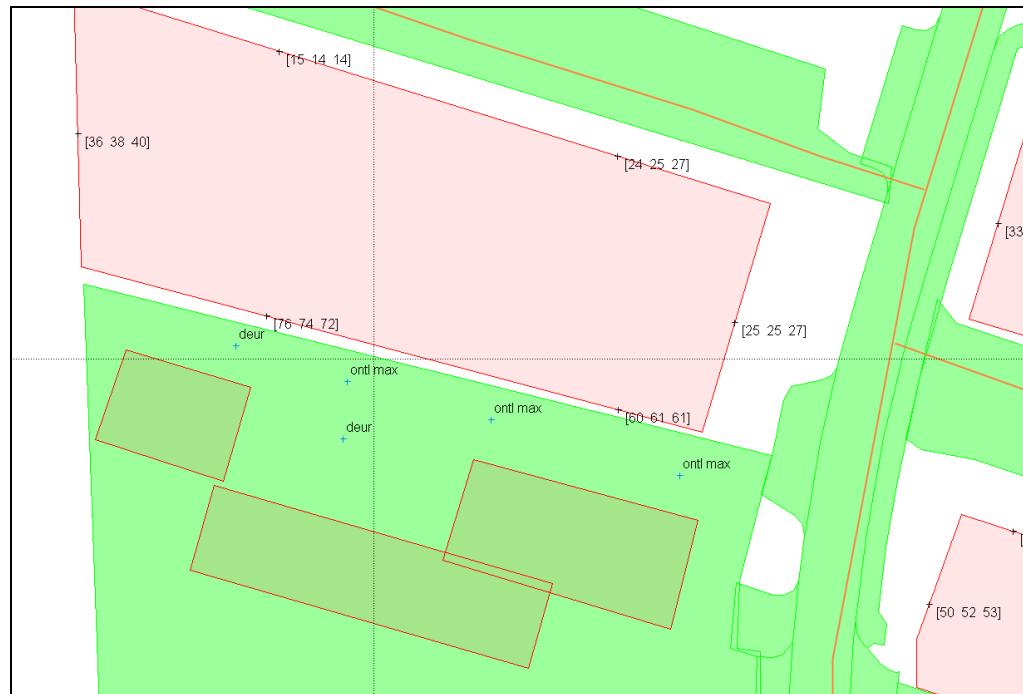

Figuur 6. Langtijdgemiddelde geluidsniveaus t.g.v. Slijkhuis kleding op bouwvlak

Uit figuur 6 blijkt dat de geluidsbelasting op één rekenpunt de richtwaarde van 50 dB(A), conform stap 2 uit de VNG-publicatie. De overschrijding is weg te nemen door het bouwvlak strak om de woningen heen te leggen (afstand vergroten) zal de overschrijding weggenomen worden. In figuur 7 is het resultaat hiervan weergegeven.

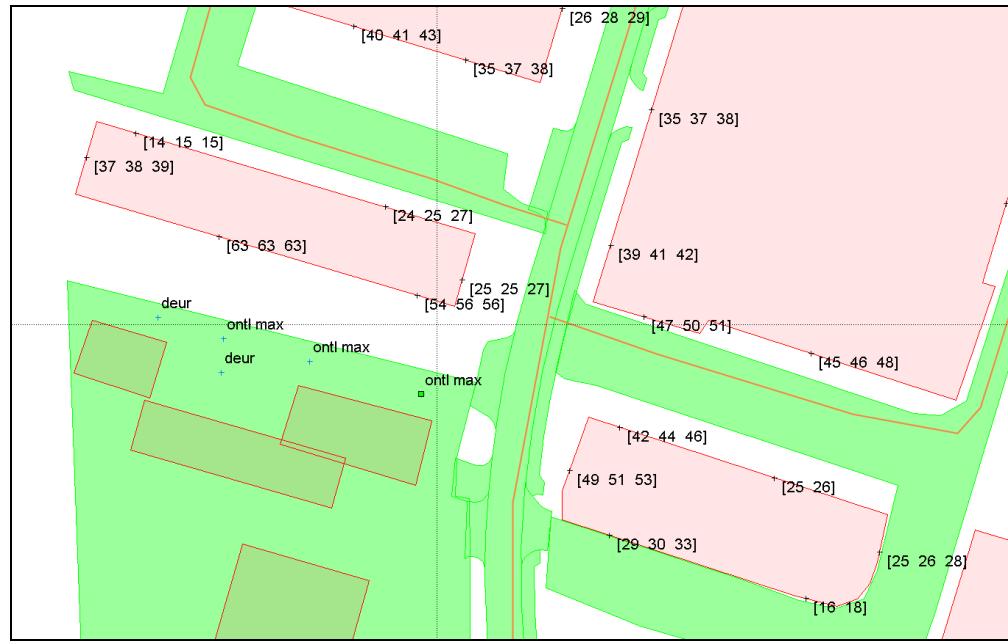

Figuur 7. Langtijdgemiddelde geluidsniveaus t.g.v. Sluikhuis kleding op woningen

In figuur 8 is de maximale geluidsbelasting ten gevolge van Sluikhuis Kleding weergegeven.

Figuur 8. Maximale geluidsniveaus dag, avond t.g.v. Sluikhuis kleding

Uit figuur 8 blijkt dat het maximale geluidsbelasting op één rekenpunt de richtwaarde van 70 dB(A), conform stap 2 uit de VNG-publicatie. De overschrijding is weg te nemen door het bouwvlak strak om de woningen heen te leggen (afstand vergroten) zal de overschrijding weggenomen worden. In figuur 9 is het effect hiervan weergegeven.

Figuur 9. Maximale geluidsniveaus dag, avond t.g.v. Slijkhuis kleding

4.2 Traffic Support

De oprit van dit bedrijf grenst niet aan het bestemmingsplan. De activiteiten buiten zullen leiden tot relevante geluidsniveaus. Rijden met voertuigen zijn in dit geval de maatgevende bronnen. In tabel 3 zijn de uitgangspunten voor dit bedrijf weergegeven.

Tabel 3. Overzicht uitgangspunten Slijkhuis kleding

| Bron | Bronvermogen | Dag | Avond | Nacht |
|---|--------------|----------------------|--------|-------|
| Auto rijden | 89 dB(A) | 30 bwg ¹⁾ | 10 bwg | 0 |
| Vrachtwagen rijden | 103 dB(A) | 4 bwg | 2 bwg | 0 |
| Portieren sluiten Lmax ²⁾ | 98 dB(A) | ✓ | ✓ | - |
| Ontluchten vrachtwagen Lmax ²⁾ | 110 dB(A) | ✓ | ✓ | 0 |

¹⁾ aantal bewegingen

²⁾ alleen ten behoeve van het maximale geluidsniveau

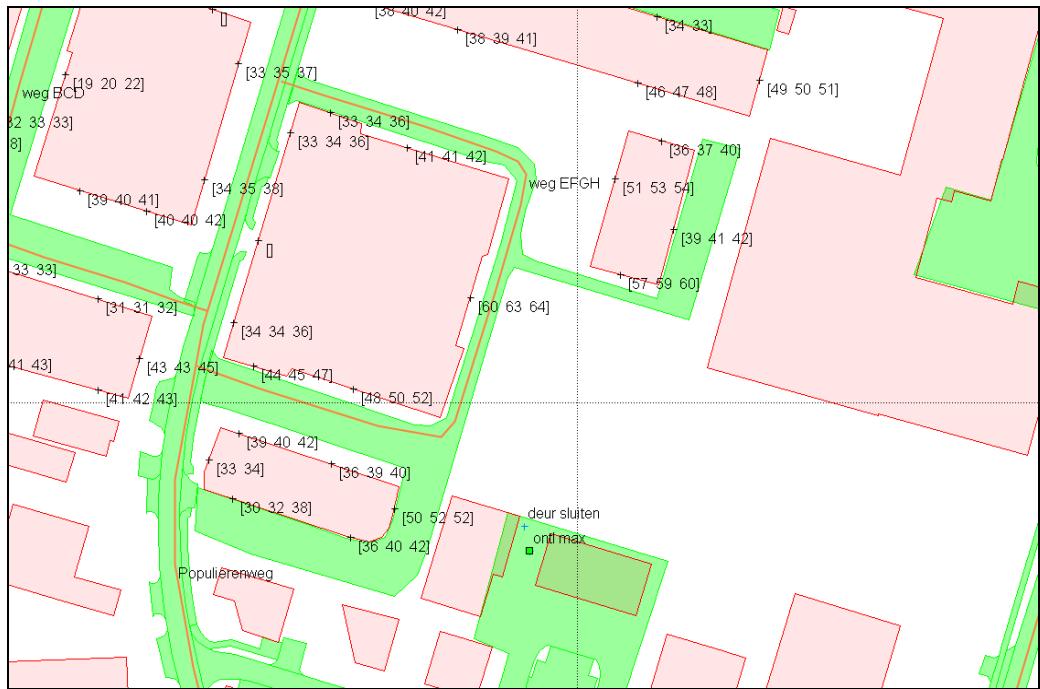

In figuur 8 is het langtijdgemiddelde geluidsniveau weergegeven.

Figuur 8 Langtijdgemiddelde geluidsbelasting t.g.v. Traffic Support

Uit figuur 8 blijkt dat aan de richtwaarde van 50 dB(A) wordt voldaan. Er wordt voldaan aan stap 2 uit de VNG-publicatie.

In figuur 9 is de maximale geluidsbelasting ten gevolge van Traffic Support weergegeven.

Figuur 9. Maximale geluidsniveau, dag en avond t.g.v. Traffic Support

Uit figuur 9 blijkt dat het maximale geluidsbelasting op geen van de rekenpunten de richtwaarde van 70 dB(A) overschrijdt, er wordt voldaan aan stap 2 uit de VNG-publicatie.

4.3 Leeuw Hattem

De oprit van dit bedrijf grenst niet aan het bestemmingsplan. De activiteiten buiten zullen leiden tot relevante geluidsniveaus. Rijden met voertuigen zijn in dit geval ook de maatgevende bronnen. In tabel 4 zijn de uitgangspunten voor dit bedrijf weergegeven.

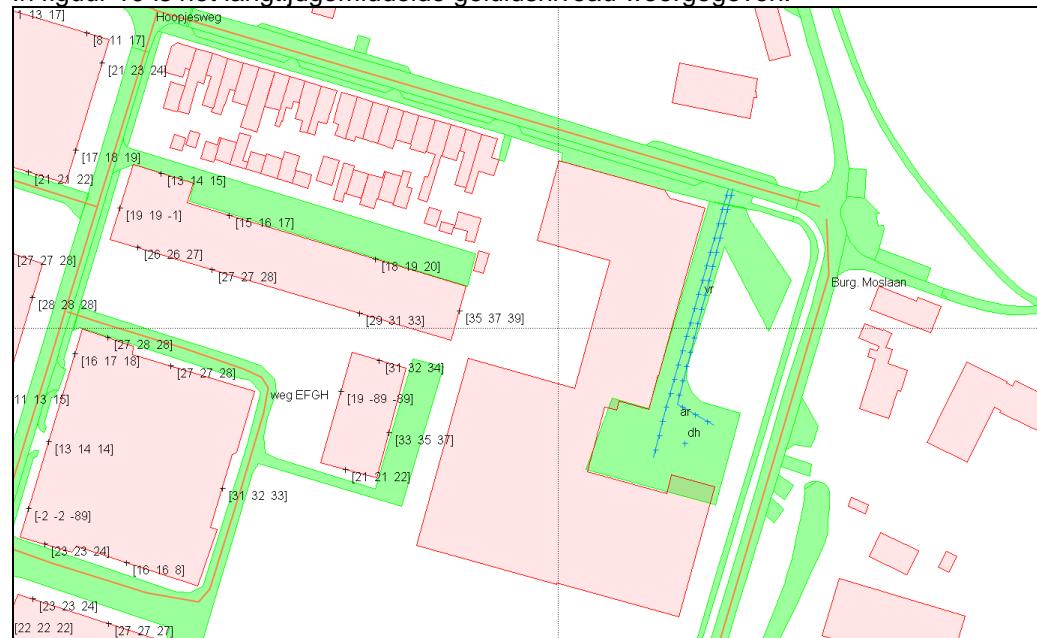

Tabel 4. Overzicht uitgangspunten Slijkhuis kleding

| Bron | Bronvermogen | Dag | Avond | Nacht |
|---|--------------|----------------------|--------|--------|
| Auto rijden | 89 dB(A) | 50 bwg ¹⁾ | 20 bwg | 10 bwg |
| Vrachtwagen rijden | 103 dB(A) | 20 bwg | 6 bwg | 2 bwg |
| Diesel heftruck | 103 dB(A) | 3 uur | 1 uur | ½ uur |
| Portieren sluiten Lmax ²⁾ | 98 dB(A) | ✓ | ✓ | ✓ |
| Ontluchten vrachtwagen Lmax ²⁾ | 110 dB(A) | ✓ | ✓ | ✓ |
| Diesel heftruck Lmax ²⁾ | 109 dB(A) | ✓ | ✓ | ✓ |

1) aantal bewegingen

²⁾ alleen ten behoeve van het maximale geluidsniveau

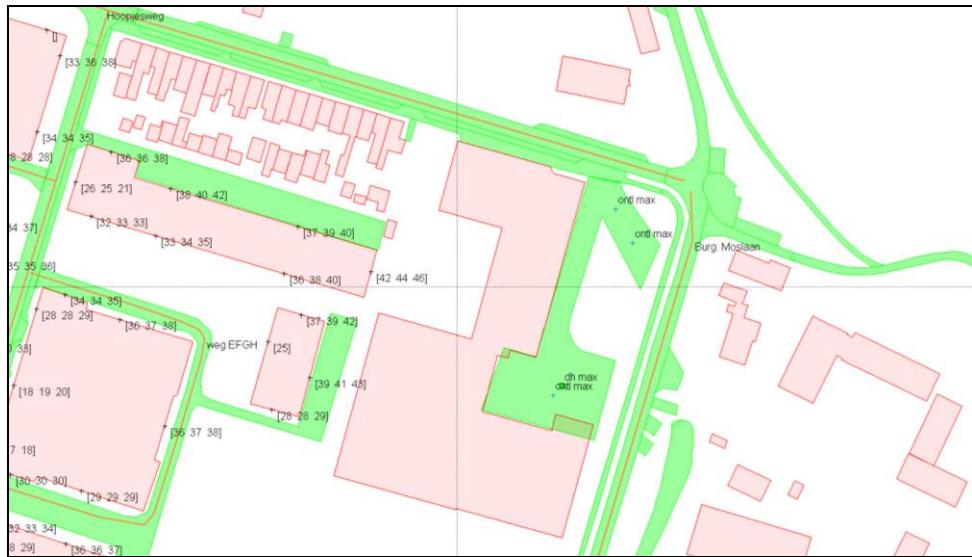

In figuur 10 is het langtijdgemiddelde geluidsniveau weergegeven.

Figuur 10. Langtijda gemiddelde geluidsniveau t.g.v. Leeuw Hattem

Uit figuur 10 blijkt dat het maximale geluidsbelasting op geen van de rekenpunten de richtwaarde van 50 dB(A) overschrijdt, er wordt voldaan aan stap 2 uit de VNG-publicatie.

In figuur 11 is de maximale geluidsbelasting ten gevolge van Leeuw Hattem weergegeven.

Figuur 11. Maximale geluidsniveau, dag, avond en nacht t.g.v. Leeuw Hattem

Uit figuur 11 blijkt dat het maximale geluidsbelasting op geen van de rekenpunten de richtwaarde van 70 dB(A) overschrijdt, er wordt voldaan aan stap 2 uit de VNG-publicatie.

4.4 Conclusie rekenresultaten

Uit de berekeningen wordt geconcludeerd dat ten gevolge van:

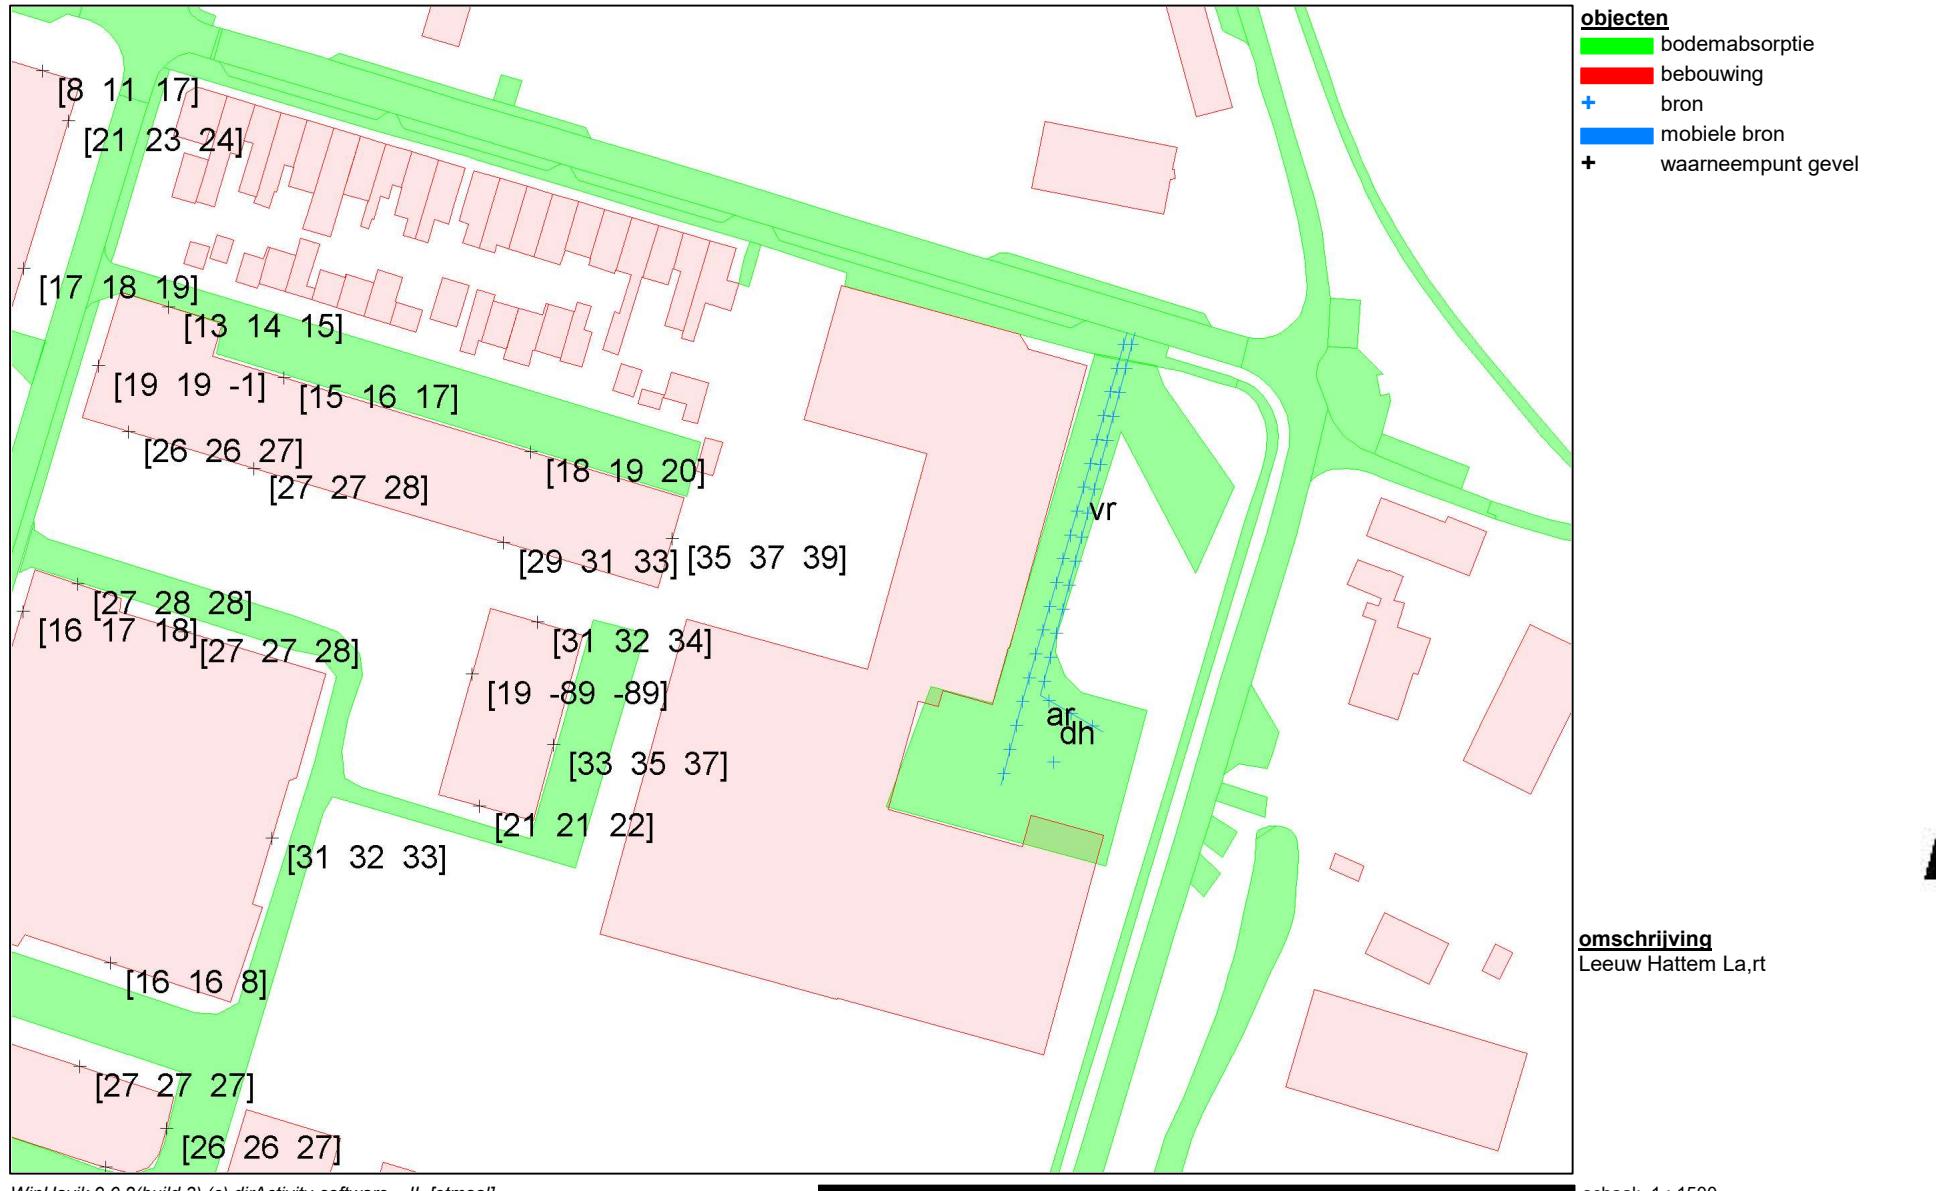

- Slijkhuis kleding, het langtijdgemiddelde beoordelingsniveau op het bouwvlak wordt overschreden, maar op de geprojecteerde woningen niet wordt overschreden;
- Slijkhuis kleding, de grenswaarden van de maximale geluidsniveaus op het bouwvlak wordt overschreden, maar op de geprojecteerde woningen niet wordt overschreden;
- Traffic Support, het langtijdgemiddelde beoordelingsniveau op het bouwvlak niet wordt overschreden;
- Slijkhuis kleding, de grenswaarden van de maximale geluidsniveaus op het bouwvlak niet wordt overschreden;
- Leeuw Hattem, het langtijdgemiddelde beoordelingsniveau op het bouwvlak niet wordt overschreden;
- Leeuw Hattem, de grenswaarden van de maximale geluidsniveaus op het bouwvlak niet wordt overschreden.
